

Press Release

AutoForm Releases the Version 4.1.2 (MKS) for Windows Users

Zurich, Switzerland, June 11, 2008: AutoForm Engineering GmbH, the leading supplier of software solutions for the sheet metal forming industry, has announced the release of AutoForm Version 4.1.2 (MKS). This version addresses Windows users and offers major advantages in terms of installation and performance.

The latest AutoForm version is developed for all Windows users and focuses on the installation and performance enhancements. It provides a zero footprint installation, which is much simpler in comparison to conventional installations, and ensures an easy and secure installation process.

The main advantages for Windows users are:

- Support of Windows XP x64 (64 bit).
- The incremental solver runs in parallel mode.
- Zero footprint installation (no interference with other software installations).
- Reduced dependency on the third party software due to easier installation. The AutoForm software can now be installed without Services for UNIX (SFU) and without the necessary environmental adjustments.

With this latest release, AutoForm provides an effective response to the needs of its Windows customers. AutoForm continues to be fully customer oriented by advancing its software, developing new and innovative technological solutions and providing best-in-class support.

About AutoForm Engineering GmbH

AutoForm Engineering develops and markets specialized die face design and simulation software for the automotive and sheet metal forming industries. With all of the Top 20 automobile producers and customers, AutoForm is recognized as the number one provider of software for product formability, die face design and virtual tryouts to the global automotive industry.
