

## Successful with AutoForm!

AutoForm Engineering is a global software company that develops and markets high-end software for die engineering and simulation to the automotive industry. AutoForm software has been successfully used by all of the Top 20 global automotive OEMs and hundreds of suppliers of stamping parts and tooling equipment. The software is being used for die engineering and sheet metal forming simulation, to carry out feasibility studies, generate tooling concepts and optimize processes. AutoForm has been honored with several international awards in recognition of the company's innovative strengths.

Based in Switzerland and with more than 360 employees worldwide, AutoForm is growing internationally, with subsidiaries in Germany, The Netherlands, France, Spain, Italy, USA, Mexico, Brazil, India, China, Japan and Korea.

For our **Software Development Department** in **Zurich** we are looking for a

## Software Developer (m/f) – (80-100%)

### Your tasks:

- Development and refinement of cutting edge tools for the modeling of production processes and the setup of simulations in our high-end software products
- Design, implementation and test of object oriented software components in C++
- Creation and maintenance of user interface functionality in QT
- Geometry modelling and visualization

### What you bring along:

- A degree in computer science, engineering or natural science
- Interest in technology, willingness and pleasure to work on complex problems
- You are a team player with strong solution-oriented engagement
- Proficiency in English and German

### What we offer:

- Exciting software development on a world-leading high-end software and implementation of cutting-edge software technologies for automotive parts production
- International culture and close cooperation with subsidiaries around the world
- Collaboration with long-standing specialists in CAD technology, simulation, graphic data processing, and metal forming technology

Start of work is as soon as possible. Please note that we are only considering applicants who have a nationality or permit that allows them to work in Switzerland. Furthermore we only consider direct applications. Please send your application file with the reference 18/14/tos per e-mail to Sonja Stamm, HR Manager Zürich. We are looking forward to receiving your application.
